

WEB DEVELOPMENT & DESIGN BY STEVE

[ABOUT](#)[WORK](#)[CONTACT](#)

A RESOURCE TO PROVIDE YOUR USERS AND CLIENTS WITH AN
EXPERIENCE THAT COMBINES BALANCED AND CLEAN COMPOSITION,
SIMPLE NAVIGATION, AND THOROUGH CONTENT

ABOUT ME

Background

My background in environmental risk management in the private sector was driven by a desire for change and continuous improvement. Accomplishments included policy development, accompanied by training presentations, and association leadership. Dovetailing with my interest in photography, front end development allows me to pursue a creative path that pairs with the analytics required for web development. This spurred my career in the front line of web development.

The Web

Web development and design skills include HTML5, CSS, Visual Design, JavaScript, UX, UI, Word Press, PHP, Photoshop, Git, GitHub, and Ruby on Rails. With this background I can take a designer's product, or create a design for you, and convert it into a web site which provides an internal and external user experience and interface that reflects both your corporate brand and personality. Whether by phone, tablet or computer, your site will be responsive to each device.

For Your Company

What is projected on the web reflects the brand, and personality of a business. In addition, it must provide a user experience and interface that culminates in a response that benefits that business entity. To meet your needs I team with you to insure the development process is conducted efficiently and that there is communication during the process. We will work on a conceptual approach together so that we have a mutual understanding of the desired user experience and interface.

RESPONSIVE, SIMPLE, AND FUNCTIONAL

Jubilee Austin

XXXXX XXXXX XXXXX practices.

Creative Images

Using a variety of applications I can create images that make a clear statement of your brand.

Rouge Pickings
